

11 Reasons to Choose EC Wise Cloud Virtual

- | | |
|--|--|
| 1 Services without the Servers | <i>Analysts estimate that 50 to 70% of the IT budget is spent managing computer infrastructure. IT needs to help their companies provide users and customer more high value services to deliver competitive advantage, but are instead spending considerable time, cost and effort managing IT infrastructure to “keep the lights on.” This represents a huge opportunity cost to the enterprise. By leveraging EC Wise Cloud Virtual, EC Wise economically manages IT assets, while providing your IT organization new time and budget for new service investments and value.</i> |
| 2 Enterprise Scale and Performance | <i>EC Wise has a strong track record delivering large scale enterprise systems that processing millions of transactions on a daily basis. EC Wise have taken on major business process outsourcing initiatives in transaction process management, integration, and web systems management; where leading solution providers had failed and where we have delivered superior business, technological and economic results.</i> |
| 3 SLA Delivery | <i>EC Wise provides economical end-to-end IT management services for operations, development and sustaining engineering with 9.99% and 9.999% SLA support. EC Wise provides operations delivery solutions to enable our clients to directly enjoy the benefits of having efficient facilities management and sustaining engineering environments without the worry of managing the underlying infrastructure. Whether EC Wise is building enterprise solutions, managing them or implementing them, we have the expertise to deliver economical results to our clients.</i> |
| 4 Data Management Experts | <i>EC Wise provides technology for data on-boarding, data warehousing, and business integration data services. EC Wise successfully designs and develops high volume enterprise databases, data warehouses and commercial products that manage content, metadata, ontologies and the relationships between business processes and information assets. We can help you create and maintain a single version of the truth, achieve transparency, facilitate governance and leverage BI to maximize your IT investment.</i> |
| 5 Workflow Based Services Management | <i>Not only can EC Wise manage and host your applications, we can also provide workflow capabilities to orchestrate service activities between application suites. If you are experiencing an “application zoo” of confusing application interfaces, EC Wise can provide cloud virtual workflow tools to help your application services to work better together.</i> |
| 6 Iron Clad Security | <i>EC Wise is an expert in providing IT security. Today we secure some of the most sensitive systems for banking, health care and finance. We are experts in PCI, trust and firewall based security models.</i> |
| 7 Development Omnivores | <i>EC Wise’s leverages J2EE, .NET and LAMP frameworks for optimal enterprise development, implementation and integration. EC Wise has deep relationships with Oracle and Microsoft for data warehouse, BI, CRM and ERP solutions. EC Wise also provides data quality and testing services.</i> |
| 8 Analytics | <i>Business intelligence, reporting, data mining and machine learning are critical areas for delivering competitive advantage to our customers. EC Wise delivers powerful analytic solutions using Oracle, Microsoft, and open technologies.</i> |

- 9** **Cloud and Virtual together in new ways** *The new generation of cloud and virtualization computing technologies are presenting new opportunities for our customers to gain new economies of scale, offer new services and gain competitive advantage; all while reducing and better managing IT infrastructure. Today, virtually everything is virtual and in the clouds – applications, data, security, development, testing, deployment and governance. EC Wise has deep experience in developing and managing end-to-end cloud environments for our clients.*
-
- 10** **We're Local and Off-Shore** *EC Wise offers a unique San Francisco based model that leverages outstanding technology resources to manage, develop and maintain our customers' IT environments. We are also supported by a worldwide team dedicated to delivering business solutions that provide competitive advantage to our customers, while also delivering great economic value to dramatically improve ROI.*
-
- 11** **We can prove it** *EC Wise has done hundreds of engagements for customers in the US, Europe and Asia. Our economical implementation model has proven to be effective for complex, high risk, high value problem solving, delivering custom solutions at a competitive price point, without costly retrofitting or configuration, to meet critical business requirements.*

EC Wise Technology Practice Areas

Enterprise Systems

- Business Architecture
- Systems Architecture
- Database Architecture
- Java Development
- .NET Development
- Open Source Development
- Database Development
- Quality Assurance
- Infrastructure Planning
- Service Oriented Architecture – SOA
- BPMN
- User Interface Design
- Content Management
- Mobile infrastructure
- Data collection infrastructure
- Cloud computing

Integration, Data Warehouse and Metadata

- ETL and data integration
- Application Integration/EAI
- Enterprise Integration
- Integration Connectors
- SOA/ESB Integration
- Cloud Integration
- Data Analysis
- Data Warehouse Design
- Metadata System Design
- Data Quality and Cleansing
- Database – Oracle, SQL Server, MySQL
- Enterprise glossary and governance
- Textual ETL

Business intelligence

- Data mining
- OLAP
- Business Reporting
- Metrics and Glossaries
- Advanced Analytics
- DW 1.0 and 2.0
- Operations Research
- BI automation
- Visual Business Intelligence

EC Wise Technology Platforms Systems and Applications

Oracle

- Oracle and MySQL DB
- High Volume Search
- Object based PL/SQL
- Development Automation
- Total System Transaction Transparency
- Workspaces and Workflow
- Reporting and BI

Java / J2EE

- Java / J2EE development
- Pervasive Integration Platform
- Spring, Hibernate, iBatis
- Enterprise messaging; ActiveMQ
- jBPM
- Oracle Database
- Adobe Director, Flash, Flex

Microsoft .NET

- SQL Server
- Reporting Services
- Analysis Services
- Integration Services
- IIS, SharePoint
- Silverlight
- .NET development
- Azure

LAMP / WAMP / Cloud Computing

- Linux and Apache
- MySQL relational database
- PHP development
- Amazon EC2
- Rightscale
- Eclipse / BIRT
- Drupal
- Salesforce.com development
- Magento and Orderwave POS
- BFP and Cortex Insight
- Nagios monitoring
- OEP
